

GIJJO

IN THE MIDDLE

I can't believe we made it here
Spent half our lives building castles
in the air
The promise that I made to you today
Together we can build our castles on
the way
I tell you boy you've got me smiling all
the time
When we make music every word's a
rhyme

Look at us we're right in the
middle
You be the banjo I'll be the
fiddle
Who knew that love would be better
here
Look at us we're right in the middle
You be the flame and I'll be the sizzle
No one I'd rather be in the middle with

I'm still trying to catch my breath
I'm going crazy wondering what's
next
and If I could build a time machine
I'd take us back to our first kiss and do
it all again
I never want to let our memories grow
cold
as long as we're alive we'll keep this on
a roll

Look at us we're right in the
middle
You be the banjo I'll be the
fiddle
Who knew that love would be better
here
Look at us we're right in the middle
You be the flame and I'll be the sizzle
No one I'd rather be in the middle with

You will always be the first one
in my life
Baby, I'll be proud to have you
as my wife
Before we tell the world and make our
big debut
We're at the part now where I tell you
that I do
Promise to be true
Baby, I love you

Look at us we're right in the
middle
You be the banjo I'll be the
fiddle
Who knew that love would be better
here?
Look at us we're right in the middle
You be the flame and I'll be the sizzle
No one I'd rather be in the middle ...

Look at us we're right in the
middle
You be the flame and I'll be the
sizzle
No one I'd rather be in the middle with
